

THE ADVANTAGE SERIES Delivers Practicality & Quality

The Advantage Series comfort stations boast waterproof, durable, and easy to maintain interiors. With extensive design options including ADA Compliant Solutions for wheelchair accessibility, these units offer compatible solutions for many industries.

Advantage Features

- Large welded stairs, platforms and handrails
- Seamless non-skid rubberized floors
- Seamless fiberglass reinforced plastic interior walls & ceiling liner
- Water saving toilets and faucets
- Wet location fluorescent lights with positive latching diffusers
- Stainless steel toilet partitions with bolt through hardware
- Porcelain covered steel lavatories
- Aluminum showers with fold-down benches and dressing area
- Locking aluminum base cabinets with mirrors
- 1" thick plastic countertops

Wide Body Standards

- Wider bodies, 8'6" vs. 8'0"
- More stations per linear foot of trailer
- Noticeable added interior space

Slim Body Standards

- Trim bodies, 6' wide
- Less imposing, lighter weight
- Multiple convenient configurations

Transportable Specialty Restroom and Shower Solutions

ACSI sets the standard for quality in the transportable specialty restroom and shower industry. As a custom, high-end trailer and skid manufacturer since 1988, ACSI has become the most trusted name in this specialty marketplace due to our reputable workmanship and product longevity.

Our team has many years of successful industry experience, offering a wide range of proven manufacturing techniques, as well as new and innovative ideas. By manufacturing trailers and skids in-house, we are better able to implement quality control measures and meet the changing needs of customers.

The ACSI Difference

In-House Manufacturing Capabilities

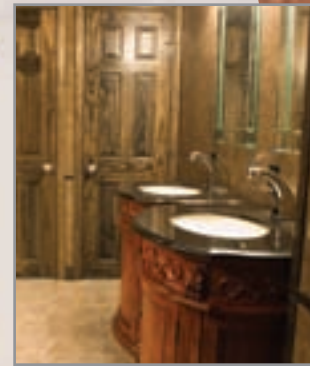

ACSI operates two manufacturing facilities in Houston, Texas, which accommodate both production line fabrication and assembly bays. Together the plants total more than 250,000 sq. ft. of manufacturing space.

Built from the Ground Up

ACSI engineers work out all the details based on your needed unit layout, final weight, optional equipment, and dimensions. Task specific parts are created from the custom-made chassis upward, one-piece at a time, according to your trailers' final form. ACSI comfort station products inherit technology, and many construction techniques, from military and first response apparatus built for America's heroes. The result is a durable transportable unit that is both easy to move, and maintain.

From practical to extraordinary, ACSI offers a full-line of trailers and skids to fit your specifications.

All trailer and skid models are built with the same quality standards. We offer the **Prestige Series**, the **Presidential Series**, and the **Advantage** and **Advantage Plus Series** to accommodate a variety of uses.

THE PRESTIGE SERIES Conveys Elegance & Sophistication

The Prestige Series adds even a higher level of sophistication to our trailer solutions as the newest line of specialty transportable restroom trailers. The elaborate style does not compare to other competitive models and the seamless FRP provides a perfect finish for graphics, company logos, and striping. The Prestige also includes the added option of a flat screen television on the exterior wall for advertisements and general entertainment.

Interior/Exterior Features

- Full enclosed stalls
- Double-glazed tinted skylights
- Seamless U.V. rated FRP exterior siding
- Ducted Air Conditioning System with heat
- Stereo system with AM/FM radio
- CD player
- Four ceiling mounted speakers

Aesthetic Features

- Textured laminate walls
- Full-length stained solid core wood doors
- Indirect fluorescent lighting
- Stained wood valances
- Stained wood base, chair rails and corner moldings
- Stained wood trim and shelf
- Cherry vanities
- Black granite tops
- Brushed nickel faucets, handles and paper holders

THE PRESIDENTIAL SERIES Suggests Style & Class

The Presidential Series provides roomy interiors with a classic, semi-formal appearance. The large, double-pane skylights bring natural light in and highlight the simulated marble wall finish with stained wood trim. These trailers offer standard and custom floor plans and an easy, one-man setup.

Exterior Features

- Thick aluminum exteriors
- Steel core entry/exit doors
- Double doors with wide aluminum steps
- Deep landings with folding aluminum handrails
- Seamless aluminum roofs
- Extended skirt

Interior Features

- Insulated floors, walls and roofs
- Heavy duty vinyl floors
- Fully enclosed stalls with wood doors and trim
- Porcelain toilets and urinals with privacy screen
- Air conditioner with heat
- Stereo sound system

Interior Aesthetic Features

- Large double-pane sky lights
- Indirect lighting
- Stained wood valances
- Oak base cabinet
- Oak toilet seats
- Brass paper holders
- Brass hardware on shelf and wood doors
- Polished brass faucets
- Simulated marble interior wall finish
- Faux Marble countertops

Presidential Models

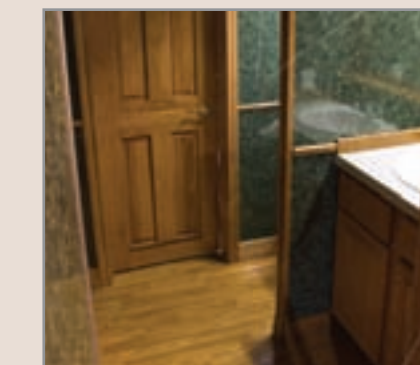

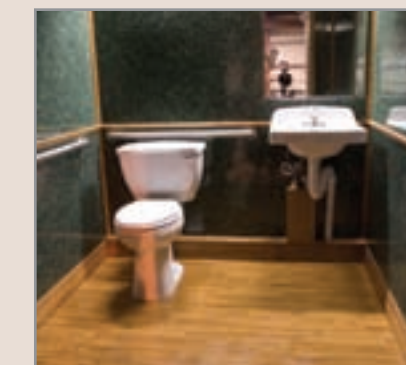

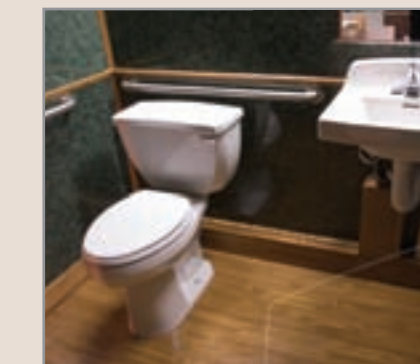

- 16 ft
- 20 ft
- 24 ft
- 26 ft
