

COMMAND SYSTEM

Unrivaed Design, Engineering, and Fabrication

Command Centers

SWAT • Bomb Squad • Security

“Having the right equipment can make a world of difference.”

Rugged Foundation

ACSI's newest line of Command Centers have virtually no limit to the configurations or end use. Design features start from the ground up. We build on truck, bus, and custom fire apparatus chassis as well as build trailers in house designed by our Engineering team for durability and strength that guarantees longevity.

Powerful Technology

In the event of an emergency the public depends on you to be organized, efficient, and quick to respond. Having the right equipment can make all the difference from integrated surveillance to communication equipment. ACSI uses the latest technology in every aspect of the vehicles we build. In addition to having every detail of your unit customized we provide technology that will be adaptable to meet new technology as it develops.

Multi-Purpose

- Command Area
- Conference Area
- Communications Hub
- Mobile Booking Units
- Hostage Negotiations Area
- Surveillance Unit
- Homeland Security
- Fire Services
- Law Enforcement
- Operational/Briefing Area
- Tactical Workstations
- SWAT Response vehicle
- Bomb Response vehicle

Command Centers

- Communications Room
- Conference Room
- Interoperability Systems
- Uplink/downlink audio/video/data
- Mast Mounted CCTV System
- Slide-out Rooms
- 50" monitors with multiple inputs
- External Workstation
- Antenna Arrays
- Light Tower
- Restroom
- Galley

Tactical

- Commander's Desk
- Locking Weapons Locker
- Dual Awnings
- Roof Platform
- Multi-Bank Chargers
- H.D. Storage Drawers
- Scene Lighting
- Exterior Gas Storage
- Wood or Metal Cabinetry
- Exterior Ram/Body Bunker Storage

EOD

- Robot Ramp or Lift
- Bomb Suit Storage with Dehumidifier
- X-Ray Viewer
- Charger for Robot
- Exterior Decon Shower
- Operator Station
- DOT Approved Drawer Storage for Explosives
- Interior/Exterior Customized Storage
- Video Recording from Robot Signal

Contract Holder

Houston, Texas based ACSI, has been designing and manufacturing equipment serving various specialized markets since 1988. In 2005 ACSI expanded its manufacturing abilities yet again to more than 250,000 sq. ft. The manufacturing facilities allow both production line fabrication, as well as assembly bays where your trailer, truck or skid unit comes together. ACSI engineers stress the necessity of tight tolerances & durability. This drives high value products designed to assure function, efficiency and performance under the most demanding conditions. Collectively, the ACSI team brings many years of successful industry experience offering a wide range of proven manufacturing techniques, as well as new and innovative ideas.
